

Say YES to Dining Support...

Strategic Dining Services is a dining and hospitality management company. Unlike third party management companies in the senior living industry, Strategic has found that retirement communities who maintain control, or revert back to self-op, for their dining program have greater opportunity to:

- Develop and attract staff
- Enhance the quality of the dining experience for all levels of care
- Create a WOW-Factor for marketing events and guests
- Re-invest the purchasing rebates and discounts into food quality, equipment or staffing
- Save money and increase quality when a third-party management company is replaced with a business model like what Strategic Dining Services provides.

Strategic is often viewed as the corporate dining support team that communities do not have. We do not replace your dining team, we provide support, training and resources to take the dining experience to the next level for your residents.
